- **Soft Skills:** Problem-solving, Team Collaboration, Adaptability to new technologies

Experience

Software Developer, Vinzas Solutions India Private Limited– Chennai

June 2022 – Present

Project: Online Building Plan Approval System

- Reduced time required for plan approval processing by 60% by implementing a streamlined workflow system using ASP.NET MVC and C#.
- Integrated the system with external RESTful APIs to automate validation checks for building codes and regulations.
- Designed and implemented a secure module for managing user data and approval documents, ensuring compliance with data protection standards.
- Developed a Windows Forms application for building rules configuration, enabling seamless integration with the scrutiny engine for automated validation.
- Implemented RDLC report generation to dynamically create and export structured reports in PDF format.
- Integrated digital signature functionality into generated reports for authentication and security.
- Optimized database queries in SQL Server, reducing query execution time by 30%.

Personal Projects

Personal Portfolio Website

[Portfolio.com](#)

- Created a responsive and interactive portfolio using Angular, highlighting professional skills, projects. Integrated animations and smooth navigation for enhanced user experience, with clean code and design.
- Technology Used: Angular

Online Booking and E-commerce System for Photo Studio

[Github.com](#)

- Implemented a full-fledged e-commerce website for a photography studio, enabling customers to browse services, book sessions, a photo gallery, and a client booking system to streamline the studio's operations and enhance user experience.
- Technologies Used: C#, .NET, Angular, SQL Server
